**CASIO.** "New Touch Sensation" QT-6000

# QT-6000

The "New Touch Sensation",  
Casio's QT-6000, the flair of a PC based system  
with stability and reliability of a cash register!

Experience the sensational clarity of the **12.1 flat panel, TFT, color operator LCD touch display**. Through the QT-6000's software, operator's can easily identify items with the ability to assign **graphical icons to keys**. Experience the QT-6000's **sound capability** used to instruct and identify operators. **The Ethernet 10/100 Base TX network** provides a fast, reliable and easy to setup communication network eliminating the hassles an operating system presents in networking. In addition to the Ethernet, the QT-6000 has the ability to implement **wireless communications** for those places difficult to run physical wire or environments where mobility of a terminal is essential. **All of this and more without a Windows operating system, hard drive or the need to add additional RAM for performance purposes.**

## Table Service Touch Sensation

The QT-6000's ability to **link server's to a "ROOM SCREEN"** which provides server's a quick selection screen of tables in an assigned area of the restaurant. **Color coding of tables** allow server's to easily identify the status of a table whether it is open, in use, been presented, occupied or has been split. In addition to the color status the table **buttons can display the servers name, check balance, time check was opened or the last time the check was opened**. A **graphical separate check screen** simplifies the splitting of checks cutting down on confusion, time and errors. **The floating of checks/tables** between terminals uses a Master/Backup Master configuration with automatic re-configuration in the case of failure between terminals without any programming being required.

## Fast Food Touch Sensation

**Graphical icons assigned to keys** assist operators in identifying items easily and speeds up transaction time that is essential in this environment. A **drive thru screen** provides an overview of orders/cars in the queue and the time they were opened to help assist the drive thru operation run more efficiently during high volume periods. The QT-6000's **large electronic journal** provides store management a detailed audit trail of operation activity over an extended period of time. The **Mix & Match/Intelligent Coupon** discounting offered in the QT-6000 will control proper pricing and discounting when combination items are ordered separately thereby increasing customer satisfaction. **Extensive Time & Attendance** provides the store management the tool to control labor costs with ability to monitor employees clocking in/out, the amount of break time employee's use, the amount of pay being dispersed per hour and a pay to sales ratio report. In addition to controlling employee labor an open interface to **video surveillance** is available for those store owner's wanting to keep a watchful eye on their operation when they can not be present at the location.

## QT-6000 Additional Features

**Floating customer charge file** with discount levels and credit limits for retail operations wanting to control their accounts receivable. **Scanning bar codes** to identify an item (UPC/EAN), to recall a customer guest check and to re-print a transaction all designed to eliminate errors in entry input and decrease transaction time.

**An optional magnetic stripe reader (QT-6046MCR)** can be used for the purpose of credit/debit operations, assigning a name to a table/check, server sign-on and customer charge identification.

**Stock control** on PLU's and departments eliminates the need of a PC and back office software.

Dallas keys-server sign-on
