

# SHARP

POS Terminal **UP-600/UP-700**

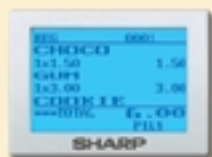

## STYLISH DESIGN

The sleek, modern design of the UP-600/700 blends easily into any interior and can add a touch of elegance to your shop or restaurant.

## LARGE MULTI-LINE DISPLAY

The backlit LCD operator panel shows 8 lines of information at a time, such as items, prices and other relevant data, for quick confirmation even in low-light environments. The display can be tilted to an angle for better viewing.

## QUICK & QUIET THERMAL PRINTING

Detailed receipts with information such as sales items, the cashier's name and messages, are silently printed out on a 58 mm-wide paper at a speedy rate of approx. 17 lines per second. Graphic logos can be printed out as well, helping to further promote your business.

## EASY BARCODE SCANNING

If during a sales transaction an item comes up as unregistered, you can register it on the spot by simply scanning the barcode and entering the price and department number. The product will be instantly added to the master product file, allowing you to run your business even more efficiently.

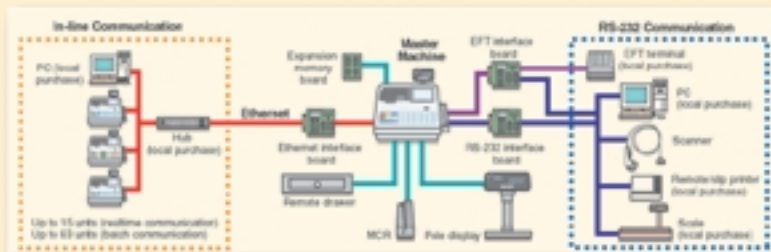

## IN-LINE COMMUNICATION

The standard Ethernet interface board lets you create an in-house network by connecting "satellite" terminals to a "master" UP-600/700. Through this high-speed (10 Mbps) in-line system, the master terminal can collect and process sales data from the satellite terminals as well as send out preset data.

## CUSTOMIZABLE FLAT KEYBOARD (UP-700)

The UP-700 lets you customize the arrangement of the keys any way you like to accommodate your specific business and application requirements. If you are upgrading from an older machine, you can arrange the new keyboard to be consistent with the old one, reducing both training time and errors. You can also switch between up to five PLU menus — a convenient feature for restaurants that change their menus or prices depending on the time of day.

## SYSTEM CONFIGURATION

UP-600

UP-700

## TRAINING MODE

This mode allows cashiers to practice operating the UP-600/700 without affecting actual sales figures.

## OTHER FEATURES

- High speed thermal printer
- Two RS-232 interface ports - standard (max. 4 ports)
- High-capacity lockable cash drawer
- Drawer alarm timer
