THE RICOH AFICIO CL7300/CL7200 **Color Laser Printer...**

Taking **Print Speed** and **Productivity** to
a Whole New Level

All the capabilities... without all the costs

Professionals everywhere face the same challenge: How can I be more productive with fewer resources to work with? The answer: Make smarter investments in technology. The Ricoh® Aficio® CL7300 and CL7200 color laser printers allow you to do exactly that. These innovative color laser printers combine the most desirable printer functions with advanced finishing features to create truly unique offerings in today's printing marketplace. Not only are they functionality rich, but they also keep operating costs low to make color printing affordable for everyone in your office.

More productivity from start to finish

An impressive 733Mhz CPU, ample standard and maximum RAM, and a proven engine allow the CL7300 and CL7200 Series to achieve exceptional speeds: **28 ppm color and 32 ppm black & white for the CL7200, or an even more aggressive 35 ppm color and 35 ppm black & white for the CL7300.** And because these speeds are maintained in duplex mode, there's virtually no drop-off in productivity when printing double-sided documents.

Looking for productivity-boosting finishing without the high price? Then these are the printers for you. Unlike most laser printers in their class, the CL7300 and CL7200 Series feature **advanced finishing capabilities, including hole punch, booklet finisher and stapler/finisher options.**

Affordable color for everyone

As productive as the Ricoh CL7300 and CL7200 Series can make your organization in the short term, it's down the road where they really begin to pay off. In fact, when measured in terms of the total cost of toner and other supplies needed to operate, the cost per print is among the lowest of any color printers in their class. And when you add in their expandable paper capacities, advanced finishing and upgradeable path to multifunctionality, the CL7300 and CL7200 can offer the best combination of performance and price available today.

Paper handling...plus

The CL7300 and CL7200 Series go beyond simple paper shuffling. Thanks to custom configuration capability, workgroups can enjoy the exact paper handling design that suits their needs. The flexibility continues with a **3,100-page total paper capacity**, and the ability to process **up to 90 lb. index stock and 12" x 18" paper** through the bypass tray for full-bleed, 11" x 17" printouts.

Output to a variety of paper stocks — with sheet sizes up to 12" x 18" — and finish by holepunching, stapling, booklet-making and more

Built-in security

With the ever-increasing threat of information theft, secure systems are especially important. The CL7300 and CL7200 Series has you covered. **SmartDeviceMonitor**, which encrypts data via Internet Printing Protocol (IPP) with Secure Sockets Layer/Transport Layer Security (SSL/TLS) technology, thwarts attempts to tap sensitive or proprietary information. For added security, the **Network Data Protection** feature enables data encryption so that only the CL7300 and CL7200 Series can properly recreate the data stream.

Advanced features

Turning your CL7200 or CL7300 into a cost-effective multifunction solution is easy with the **IS300e Image Scanner upgrade**. Not only can you capture up to 11" x 17" full-color originals in 600 dpi resolution, the IS300e also functions as an occasional color and monochrome copier. Plus, innovation features like **Scan-to-Email, Scan-to-Folder FTP/SMB and Network TWAIN** capability allow you to dramatically streamline document distribution and storage.

The CL7300 and CL7200 Series also offers another great option: **Digital Still Camera Direct Print Availability**. Simply connect a PictBridge enabled digital still camera directly to the printer to make printing digital photos easier than ever.

All the right connections

The CL7300 and CL7200 Series is built to accommodate a variety of connections, including standard **10/100BaseTX, USB 2.0, optional IEEE 802.11b, Bluetooth**, and the all-new **Gigabit Ethernet Support**. The CL7300 and CL7200 Series are also equipped with all the right print drivers, including **genuine Adobe®PostScript® 3™, PCL 5c, PCL 6 and Ricoh RPCS**.

Open Architecture Embedded Software Architecture

The Aficio CL7300 and CL7200 exceed industry standards with Ricoh's **Embedded Software Architecture™** – an innovative Java (J2ME) compatible software development platform. The **Embedded Software Architecture™** allows for the development of key applications that run on Ricoh MFPs and Laser Printers, dramatically enhancing your organization's workflow. The Aficio CL7300 and CL7200 can easily be customized to meet your needs by controlling features such as: the operation panel, printing, saving files and scanning.
